WHY WORK TOGETHER?

The drug treatment sector as it is currently does not encourage working together across providers.

We felt it was important to gather harm reduction leads from across the sector to work together on common issues.

- * DRUGS ARE CHANGING
 - * MESSAGES MORE CREDIBLE IF THEY COME FROM ACROSS THE SECTOR
 - * HARM REDUCTION IS REINFORCED IN SERVICES
 - * COMPREHENSIVE APPROACH
 - * GREATER LIKELIHOOD OF PEOPLE SEEING THE MESSAGES
- 

NITAZINES

WHAT ARE THEY?

- A group of synthetic opiates
- Entered the drug supply in the UK about four years ago
- Beginning to be seen more broadly
- Concerns about them in the heroin market
- Also detected in non-opiates, like benzos

WHAT CAN BE DONE?

- SAFE SUPPLY
- Drug testing/checking
- Good treatment options
- Widespread naloxone
- Overdose awareness

USING DRUGS?

To reduce your risk of an overdose, please take **extra precautions** when using any type of drug

Drugs are
changing

Overdoses
are rising

Assume it's something else

Any drug could be something else

Reduce risk of OD

Test dose

Go low and slow

Stagger dosing among your mates

Make a rescue plan

How would anyone know if I
overdosed? How would anyone find
me?

Carry Naloxone

YOU are important

Carry Naloxone
Ask "how would anyone know if I overdosed?"
How would anyone find me?"
YOU ARE IMPORTANT

My Stayin' Alive Plan

- 1.
- 2.
- 3.

STAYIN' ALIVE

A collection of materials designed to draw attention to the fact that drugs are changing and to encourage people to make a rescue plan.

DO SOMETHING

A poster campaign designed to raise awareness of naloxone and to encourage bystanders to act in case of an overdose.

IN RESPONSE TO NITAZENES

2 THOUGHTS WE WANT
ALL DRUG WORKERS TO
HAVE.....

1. How can I ensure the person I'm working with **comes back** to see me?
2. How do I ensure this person is **alive** in order to do so?
